

Xinbao Qiao (乔鑫宝)

(+86)-156-5011-0930 | xinbaoqiao@zju.edu.cn | [Homepage](#)

EDUCATION

- **Zhejiang University** 09/2022 - 12/2025
Master in Artificial Intelligence
 - Relevant courses: AI Algorithms and Systems (100), Secure Artificial Intelligence (97)
 - Major GPA: 90/100 (Rank: 3/25)
- **Shandong University** 09/2018 - 07/2022
Bachelor in Communication Engineering
 - Relevant courses: Data and Computer Communications (95), Wireless Communications (90)
 - Major GPA: 82.47/100; Award: Third-class Academic Award 2018-2019

RESEARCH INTERESTS

- Trustworthy Machine Learning, including interpretability, privacy, security, and robustness.
- The intersection of AI with network, including AI for communication, communication for AI.

PUBLICATIONS

- [1] **Hessian-Free Online Certified Unlearning**

Zhuoyan Shao, Peihua Mai, Xinbao Qiao, Meng Zhang, Xinyue Zhou, Yan Pang. 2026. (Nat. Mach. Intell., Under review)
- [6] **When Sample Selection Bias Precipitates Model Collapse**
Xinbao Qiao, Xianglong Du, Wei Liu, Jingqi Zhang, Peihua Mai, Meng Zhang, Yan Pang. 2026. (ICML, Under review)

RESEARCH EXPERIENCE

- **Research on Data-Centric ML Systems** *M.Eng. Student, 03/2023 - 12/2025*
Advisor: Prof. Meng Zhang, Zhejiang University
 - **Data Influence Attribution.** Developed theoretically guaranteed approaches to quantify and analyze the influence of data on learning models, and designed unlearning techniques to remove these influences.
 - **Trade-offs in Trustworthy Artificial Intelligence.** Investigated and developed data-centric methodologies to balance fairness, robustness, privacy, and utility in machine learning systems.
 - **Cloud-Edge Collaborative Human-Space Healthcare.** Architected cloud-edge collaborative frameworks for real-time multimodal data monitoring of human health using video, audio, and sensor signals.
- **Research on Trustworthy LLM systems** *Full-time Research Intern, 06/2025 - 12/2025*
Advisor: PANG Yan, James, National University of Singapore
 - **Illusory Pattern Perception in LLMs.** Examined whether LLMs exhibit illusory pattern perception, a known human cognitive bias, and offered an interpretable framework to account for LLM behavior.
 - **Synthetic Data Evaluation.** Developed a distributed Wasserstein collaborative algorithm, providing a private Wasserstein methodology for synthetic data evaluation when real data is limited.

SKILLS

- **Programming:** Python (advanced), MATLAB (advanced), L^AT_EX(advanced), Markdown (advanced), C/C++, Linux, Java, and Frameworks & Tools: TensorFlow, PyTorch, SQL, Git, Linux, Docker etc.
- **Language:** Mandarin (native), English (IELTS 6.5)
